

PEMBROKE OPEN SPACE COMMITTEE

Preserving the Irreplaceable

2020 Open Space Management Guidelines:

Updated: 12/2/2020

1.0 Goals and Objectives:

These guidelines are developed to facilitate the Planning and management for Pembroke's conservation and recreation lands that support passive recreation and protection. These guidelines aid in executing the current Open Space and Recreation Action Plan, and support Goal 4; from the Pembroke Open Space and Recreation Plan

Goal 4: Help the citizens of Pembroke enjoy better access and increased recreational use of town open space.

- Increase access to open spaces in Pembroke.
- Educate the public about the existence importance, and possible uses of town open space.
- Improve maintenance of the town's recreation areas.
- Connect existing trail systems for enhanced recreational use.

2.0 Stewardship of Open Space Properties:

The towns Open Spaces must serve a multitude of purposes. Properties will be maintained and managed consistent with the identified goals of the Towns Open Space and Recreation Plan, subject to fiscal and other considerations. Management of properties will include periodic monitoring to identify maintenance needs, safety, and other concerns. The Open Space Committee will review modify and amend the management plans on a bi-annual basis to ensure that goals are being met and projects are properly closed out.

2.1 Management of Open Space Lands

A. Pembroke Open Space Committee

is a subcommittee of the Pembroke Conservation Commission to assist and provide support to the town regarding issues relevant to open space protection, stewardship and use. The committee also prepares and updates the town's open space plan, which allows the town to qualify for funding opportunities it otherwise would not.

B. Notification to Abutters

Abutting property owners shall be notified in advance if any Conservation Commission or Open Space Committee activities have the potential to create a disturbance or nuisance.

PEMBROKE OPEN SPACE COMMITTEE

Preserving the Irreplaceable

2.2 Maintenance and Stewardship of Open Space Lands

A. Physical Improvements

Physical improvements or maintenance of the properties are to be conducted when necessary to promote the goals of the management plan. Development of structures or paved surfaces is to be minimized, utilizing the National Parks guidance for Sustainable trails.

B. Trails and Crossings

In general, trail development for passive recreational use is encouraged on Town Open Space Properties. Stream and wetland crossings will be monitored, and trail improvements will be provided, as necessary. In all cases safety, erosion control, and sensitivity of the land will control the creation and closing of trails.

C. Natural Area Designation

Some properties may be designated to be left in their natural state without physical changes, routine maintenance, or possibly public access.

D. Fencing

In general, use of fencing on open space lands is discouraged. Under certain conditions fences may be required as specified in a property's site-specific management plan.

E. Forest Management

Forest Management activities shall only be conducted in accordance with the Massachusetts Forestry Best Management Practices Manual. In general Town of Pembroke, will avoid clear cutting or extensive selective cutting of forests, except as needed for public safety, planned recreational needs, or for specific wildlife management plans.

Preserving the Irreplaceable

3.0 Uses of Properties:

Passive recreational use of Town Open Space by the public is encouraged where environmentally and socially appropriate. Activities on these properties should be accompanied by improved public access and awareness. Where lands are environmentally sensitive or human use may be detrimental, public use should be discouraged and restricted. Types of access and use of properties vary by property. The town seeks to match the goals and objectives listed in Section I with individual property management plans.

3.1 Conditions of Use for All of Pembroke's Open Space Properties

- All town open space lands shall carry in/carry out. No person shall drop, throw, or place any litter, garbage, or other refuse on town open space lands. Trash receptacles shall not be provided.
- No person shall dig up, cut, break, remove, deface, defile, or ill use any building, structure, fence, sign, bush, plants, turf, rock, or any other thing located on the area owned or controlled by the Town.
- No solicitations shall be performed on Town property without written approval from the Town of Pembroke.
- Parking is permitted in designated parking areas only.
- Dogs must be under control at all times to protect sensitive wildlife values and respect other visitors.
- Please respect the rights of private property owners by staying within the conservation area.

3.2 Permitted Activities

In general, public access is encouraged on the Town of Pembroke's open space properties. Types of access vary by property. In all cases, state, statute, or town ordinances that place protections and restrictions upon public property are applicable. Permitted activities are:

- Running / Walking / Hiking
- Nature Photography / Bird Watching
- Canoeing / Kayaking
- Cross country skiing and snow shoeing
- Dog Walking (effectively restrained by a chain or leash, or is under immediate and effective control of a handler in accordance with, General Bylaw Article XX Section 7)
- Environmental education and nature study
- Horseback Riding
- Bicycling on trails
- Fishing (in accordance with town Fishing License and State of Massachusetts Fisheries regulations)
-

3.3 Forbidden Activities

- Carrying and/or use of alcoholic beverages
- Littering or disposing of household garbage, trash, or other materials
- Fouling of any well, brook, stream, or any body of water
- Disposal of animal carcasses

PEMBROKE OPEN SPACE COMMITTEE

Preserving the Irreplaceable

- Conduct and activities unreasonably disruptive such as drunkenness, breach of the peace, and disorderly conduct offensive to the general public
- Disposal of sand gravel, fill, brush, and other household or commercial materials or refuse without the permission of the Town of Pembroke.
- Harvesting or collecting of animals and plants except for scientific or educational purposes; and with prior written approval by the Town of Pembroke.

4.0 Enforcement, Emergencies, and Communication:

4.1 Enforcement of Open Space Management Plans

The Board of Selectmen or its designee will enforce the rules and regulations as necessary to preserve the Town's open space lands for their intended uses, including such fines and restrictions as may be permitted by law.

Please report violations to the Pembroke Police Department at (781)-293-6363

Hunting violations may be reported to the Environmental Police at (508) 366-6537

4.2 Emergency Response

The Town's Fire, Police, and EMT personnel are responsible for emergency procedures to be in place for response to emergencies at town open space lands. Motorized vehicles are allowed on the open space lands for public safety emergencies without prior written permission of the Town of Pembroke.

4.3 Communication

Comments, suggestions, requests for permission, and all other communication with regard to this plan should be directed to the Pembroke Selectmen's Office.

Town of Pembroke City Hall
100 Center Street
Pembroke, MA 02359
Tel: (781)709-1400

5.0 Town Open Space Properties:

For a full inventory of open space, please refer to Pembroke's Open Space and Recreation Plan, or the Town of Pembroke Website: www.pembroke-ma.gov

Preserving the Irreplaceable

6.0 You are the owner, and You are the customer:

SUGGESTIONS FOR SAFETY AND ENJOYMENT

- BINOCULARS AND FIELD GUIDES can add pleasure to a walk.
- For longer outings, pack WATER AND A SNACK.
- REMAIN ALERT - Although our stewardship staff and volunteers work hard to keep trails free of hazards, some may be encountered. Please let us know if you notice a major concern.
- CHECK FOR TICKS on yourself, children, and pets during your visit and at its conclusion. Tuck pant legs into socks and stay on marked trails to reduce the risk of bites.
- AVOID POISON IVY, which grows along some trails: "Leaves of Three, Let it Be." Oils from leaves, stems, and roots can cause rashes at any time of year. Wash with warm, soapy water if exposed. Poison sumac is rarely encountered, as it grows in wet habitats where trails are not generally located.
- BITING INSECTS - If you are bothered by mosquitoes and other biting insects, remember to bring repellent.

Attachment 2:

Arthur & Michelle Lage Nature Preserve Property Management Plan

Access at: Barker Street

Overview

Leverage the parcels favorable geography and create an optimized wildlife feeding and shelter preserve in the middle of the wildlife corridor. Develop new opportunities for passive recreation (wildlife viewing, gardening, hiking). Use selective mowing of former equestrian paddock removing woody shrubs and brush, but leaving existing food sources such as blackberries, grapes, blueberry bushes as thickets as food sources for native wildlife. Provide nesting boxes for vulnerable bat and raptor species in premier locations along forest border.

Actions

- Finish trail sections for regular public use; improved trail surfaces and signage
- Install 80ft of Bog Bridge sections on Fairwood Through Trail using local trees and Forestry Service best practices or solicit donations and volunteers for building conventional boardwalk
- Selective mowing of Old Fields and thinning tree lines to prevent Forest Succession and maintain Fields as Grasslands.
- Thinning trees and young forest fringe
- Using best practices and removing identified invasive shrub species
- Cultivate Native Wildflowers and bushes to improve food sources in Wildlife Corridor
- Contact Natural Heritage & Endangered Species Program for Habitat inventory or study.
- Install single chamber and 3-chamber bat houses and Nesting Platforms
- Demo fences from around house and goat pasture out back
- Remove Debris from initial Volunteer Clean up
- Temporary Bridge for Little Pudding Brook Crossing
- Patch Roofs for Garage and Stable
- RFB and Plan Permanent Repairs for Roofs
- Conservation Restriction drafted for property
- Permanent Bridge for Little Pudding Brook Crossing (7ft wide, ~20ft long; Built to withstand weight of ATV plus 4 adults)
- Demo old goat stable (mini excavator or backhoe needed)
- Pull old truck from stream bed (mini excavator or backhoe needed)
- ~~Demo and pull out old bridge (mini excavator or backhoe needed)~~ Completed 10/18/20
- Develop Plans and Demo House, breakup, and back fill foundation for Parking Area
- Lage Preserve Signs
- Community Garden Broadcast, gauge public interest for how many plots will be sufficient
- Walk field, get measurements, and make a rough outline for community garden

PEMBROKE OPEN SPACE COMMITTEE

Preserving the Irreplaceable

- Evaluate feasibility of large garden bed for lease to local Farmer
- Run Water Line and Spigot for Community Garden (Hand watering Only)

Additional Notes:

Barn Swallow Habitat “Red Bird Stable”

Bird habitat / used for stock storage / some trail tools storage (loose enough for birds, then not an ideal storage location for expensive assets)

Proposed options for Permanent Bridge crossing:

Plans and Drawing online resource:

PEMBROKE OPEN SPACE COMMITTEE

Preserving the Irreplaceable

Good

Conventional Forestry Services Stream Crossing Design
Utilize Used Utility Poles for Girders w/ Treated 2x6's for decking

Better

Conventional Stream Crossing Design
Steel I-beams as Girders w/ Treated 2x6's for decking

Preserving the Irreplaceable

Best

Historic Design to add visual interest and context to area.
Could model it off one of the Historic Herring Run Crossings.

Maintenance

Minor changes in the frequency and timing of mowing, deck height, mower speed, and cutting pattern can improve our parks' resources.

- Avoid mowing the entire grassland in a single year. Instead, divide the grassland into two or three sections and mow each section only once every 2-3 years.
- Grasslands with extensive trees and shrubs will require hand cutting prior to mowing.
- Hand cut any invasive plants in fruit prior to mowing; keep these cut materials away from your mower deck so that you don't spread their seeds.
- Wash equipment both before and after mowing in order to prevent the spread of invasive plants.
- Mow as late in the year as possible. Many of our pollinators need fall flowers as a food source. Cutting should occur only after the late summer and fall flowers have died back.
- If you can't delay cutting until the late fall, wait until at least after September 15th. This ensures that nesting birds and turtles are out of the field before you cut.
- Use a mowing deck height of at least 7 inches above the ground; 12 inches if possible. This protects your equipment and avoids killing wildlife.
- Mow in low gear or at slow speeds so that wildlife has time to avoid the tractor and mower.

Preserving the Irreplaceable

- Mow in a pattern that allows wildlife to escape the tractor and mower. Start mowing from the center of the field and use either a back-and-forth approach, or a large circular pattern. This avoids concentrating fleeing animals where they may be killed or stranded.
- If a trail passes through your grassland, mow the trail edges as needed with a small lawnmower to keep the trail open as a single track.
- Educate park goers about the goals and benefits of your grassland management. Healthy, managed grasslands look different than lawns, and may be unfamiliar to the public.

Preserving the Irreplaceable

Attachment 3:

Community Gardens @ Lage Preserve Resource Management Plan

Access at: Barker Street

Overview

Create a Community Space that improves the quality of the lives of its residents. Offering a new and diverse activities that can be enjoyed by all members of our community young and old. Leverage surrounding assets and combine a Community Garden with a popular Nature Preserve along a Wildlife Corridor that is designed to attract and benefit local wildlife.

Trying to create a net positive asset for the Town of Pembroke, by utilizing an underused space and being designed from the beginning to be self-sustaining enterprise. Modeled off of other successful Community Garden partnerships in the region, Town of Norwell and Cross Street Flowers as an example.

Actions

Use White Garage wall facing street as billboard with mural / signage. To be used as farm stand and Community Garden Stewards HQ. Nice to have power / water / secure to be most effective.

Alternatively, could use the 191 Barker Street Location as Community Garden Farm stand and improve locations feasibility as Farmers Market Location while out of season from Kiwanis Xmas Trees fundraising.

Wood shed

Community Gardeners storage for long handled tools

Reuse old school / gym lockers for members to rent to store (trowels / gloves / seeds ect)

- Sixteen x 8 ft by 4 ft raised beds
- Four x 4 ft by 4 ft raised beds
- Ten x combined of the above ADA accessible table-height garden beds
- Install Rain barrels
 - Drip irrigation to these ADA beds? (Could utilize Rainwater Collection from gutters)
- Fenced enclosure to deter from wildlife and vandals
- Compost bins provided (pallet construction with latched gates)
- Compost and fill trucked in from Monroe Street Pits for establishing raised beds
- Vertical Gardens for kids on side of building
- Signage and education for residents (Greenscapes / composting/what is organic / USDA Hardiness zones/water runoff/pollution)
